Rahul Sain

Full Stack Developer | React, Node.js, TypeScript, PostgreSQL

Alwar, Rajasthan, India (open to remote) | +91-9602958067 | sainrahul374@gmail.com | linkedin.com/in/rahulxcodes | github.com/Anos714 | rahulxcode.vercel.app

PROFESSIONAL SUMMARY

Full stack developer with 3+ years of experience shipping production web apps and AI products end to end. Strong in React, Next.js, TypeScript, Node.js, Express, PostgreSQL and MongoDB, with hands-on Redis, Docker, AWS and LLM integration. Ships a feature from schema design to deployment and debugs it in production.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, React Hooks, React Router, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, RBAC, Zod validation, WebSockets (familiar), Hono
Databases: PostgreSQL, MongoDB, Mongoose, schema design, indexing, query optimisation, Redis, Drizzle ORM
DevOps and Testing: Git, GitHub, Docker, AWS (EC2, S3), CI/CD, Vercel, Playwright, Bun test, Jest (familiar)
AI: Generative AI, LLMs, Gemini, Groq, OpenAI-compatible APIs, structured outputs, RAG (familiar)

EXPERIENCE

Full Stack Developer (Freelance) **Sep 2023 – Present**
Self-Employed *Alwar, India*

- Delivered web apps end to end for clients: responsive React interfaces, Node.js and Express REST APIs, PostgreSQL and MongoDB schema design, and deployment with post-release fixes.
- Implemented authentication, role-based access control and validation at the API layer, worked in Git-based code review, and shipped with Playwright test coverage.
- Built AI features that turn a prompt into structured JSON output, with retry and provider fallback so a failed call degrades instead of breaking the flow.

Python Developer Intern **Jun 2024 – Aug 2024**
ONLEI Technologies *Remote, India*

- Wrote and maintained Python scripts for data handling and basic automation, with documented code the team could run without a walkthrough.
- Returned for a second internship in 2025 with the same team for data-handling and automation work.

PROJECTS

Xcel / *Next.js, React, TypeScript, Express.js, PostgreSQL, Redis, BullMQ, Gemini AI* **2026**
xxcel.vercel.app | github.com/Anos714/Xcel

- Built an AI SaaS that turns one prompt into scheduled, published social threads, chaining a React dashboard, an Express REST API, a Redis and BullMQ job queue, and a third-party publishing API.
- Published 400+ posts autonomously with per-job status tracking, exponential backoff retries, and indexed queries that removed queue polling latency.

CodeVault / *Next.js 16, React 19, TypeScript, PostgreSQL, Drizzle ORM, Better Auth, Monaco* **2026**
codevault-self.vercel.app | github.com/Anos714/CodeVault

- Built a full-stack snippet library with reusable React components, owner-scoped CRUD server actions, Zod validation, Better Auth sign-in, and role-checked access on every write.
- Implemented URL-driven search on a PostgreSQL full-text index, keyset pagination, atomic counters, and a Playwright end-to-end suite covering the core flows.

Waku / *Next.js 16, React 19, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Better Auth* **2026**
wakucards.vercel.app | github.com/Anos714/waku

- Built a profile publishing platform where the editor preview and the public page share one React component, removing preview mismatch and abandoned drafts.
- Shipped a token-based theming system spanning 10 themes and 8 font pairings, plus AI bio generation with Zod-validated structured output.

Inkwell / *React, Bun, Hono, PostgreSQL, Drizzle ORM, Redis, TanStack Query* **2026**
inkwell-blogs.pages.dev | github.com/Anos714/Inkwell

- Built a blogging platform on a Bun and Hono service with sub-30ms REST responses, PostgreSQL schema design, and an Upstash Redis cache layer for instant reads.
- Implemented Google OAuth 2.0 with role-based access control at the API layer, plus a Markdown editor with live preview, autosave and optimistic updates.

stackit / *TypeScript, Bun, Next.js, MongoDB (MERN scaffolds), Go (Fiber), Docker, CLI* **2026**
stackitcli.vercel.app | github.com/Anos714/stackit

- Published create-stackit-app on npm (100+ downloads), a CLI that scaffolds MERN, PERN, Hono with PostgreSQL and Go with Fiber monorepos with Docker and docs in one command.
- Shipped the Next.js documentation site and a 13-test Bun suite with type checking wired into the build pipeline.

EDUCATION

Bachelor of Technology in Computer Science Engineering, Lords University, Alwar **Expected May 2027**
Coursework: Data Structures and Algorithms, System Design, DBMS, Operating Systems, Computer Networks

ADDITIONAL INFORMATION

- Portfolio: rahulxcode.vercel.app - five public repositories with live demos and tests; `create-stackit-app` on npm.
- Based in Alwar, Rajasthan, open to remote or relocation, immediate joiner. Languages: English, Hindi.
